

Scientific Writing For the Surgical Trainee

Dr. James Kigera
Editor in Chief
Annals of African Surgery

Outline

- Why
- How
- Tell the World

SSK

WHY?

Me, Myself and I

- MMed
- Before graduation
- Job
- Promotion/Tenure
- Grants
- Recognition
- Network with others

it's all about

ME

SSK

For Humanity

- Global or Local question
- Inform the world
- Validate a new technique/aspect
- Document your experience
- Stimulate Interest

SSK

How?

Start Early.....Now

- Join Existing Study
- Simple solo projects
- Practice makes Perfect
- Manage Expectations

SSK

Form Teams

- Learning
- Collaboration
- Impact
- Funding

SSK

Formulate Good Questions

- New
 - Treatment
 - Population
 - Knowledge
 - Disease distribution
- Interesting
- Practice Changing
- Based on Sound Science

SSK

Where Do I Start?

- Common Conditions
- Presenting as expected
- Managing them like others
- Outcomes any different

SSK

Starting Point...

- What is topical
 - Specialty
 - Global
- Aligning to Funders/Policy
 - COVID
 - NCDs
 - Maternal Health

SSK

Should be

- Clear – Easily Understood
- Focused – Narrows on a specific issue
- Concise – Needs few words
- Objective – Measurable
- Complex – Not Yes/No
- Arguable – Not Accepted Fact
- Relevant – To situation/times/specialty

SSK

Should be

- Original – Novel, New Aspect
- Interesting – Appeals to target audience
- Researchable – Using means available to you
- Ethical – Human/Animal, Special Groups
- Analytical - Better than Descriptive

Steps

- Choose a general topic
- Research on the topic –
Better than Armchair
Speculation
- Consider Target
Audience
- List Preliminary
Questions
- Evaluate the questions

SSK

Consider the Following

- Resources
 - Human
 - Facilities
 - Financial
- Expertise
 - HR
 - Clinical
 - Statistical
- Time
- Your Passion

SSK

Steps...

- Consider HOW they could be answered
- Find a niche/gap
- Answer 'So What?'
- Hypothesize – For, Against
- PICO/PEO
- Begin your research!!!

TELL THE WORLD

- The dissertation is >50 pages long
- The dataset has >50 variables
- Journals will only accept about 3000 words or 4 pages
- You believe every single page of the dissertation/dataset is very important
- Not many people share that view

SSK

Solution

- 1 dissertation – 1 manuscript?
- Not Really
- What are the messages in your dissertation?
- Break them down into simple distinct messages
- Write a paper for each of the messages

SSK

Example - Dissertation

- Treatment and outcome of Ankle injuries
- Included data on closed fractures, open fractures and ligament injuries

SSK

Example... Messages

- Open Fractures should be managed early – Compare outcome of Early vs Late Mx
- Unstable injuries should be operated on – Compare outcome of ORIF vs POP
- Ligament injuries have poor outcome – Outcomes of ligament injuires

Condense the Material

- Introduction – 1st 2 lines of the Introduction
- Literature Review – Body of Introduction
- Justification, Hypothesis, Objectives – Last line of Introduction

SSK

Condense.....

- Methodology – Just the important steps – 2 paragraphs
- Results
 - Summarise the raw data first
 - Be candid (dropouts, missing data etc)
 - Only include the variables that tell the story you want to state
 - Figures and Tables should summarise results not require detailed explanations

SSK

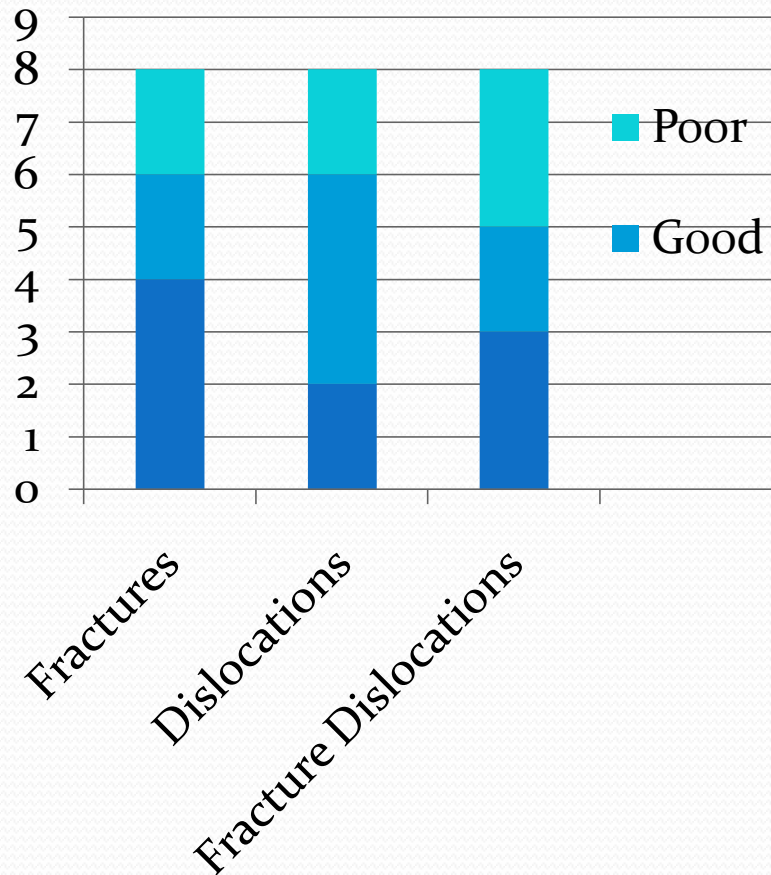

Examples.....

- Forty percent of patients who had fractures reported excellent outcomes when compared with 20% of those who had dislocations and 30% of those who suffered fracture dislocations.....

SSK

Examples.....

- Fracture dislocations were associated with a higher incidence of poor outcomes (Figure X)

Discussion

- Paragraph 1 – Summarise important results
- Paragraph 2 – How does your data compare to other studies
- Paragraph 3 – Postulate as to why your results are as they are
- Conclusion – What is the implication of the results in science

Summary

- Altruistic Research
- Collaboration
- Ask Good Questions
- Distil Dissertation
- Publish or Perish

SSK
